Anti Mouse Fcα/μR Monoclonal Antibody

Clone No. TX61

This antibody was prepared by Dr. Akira Shibuya, Tsukuba University.

Code No. KO572
Target Fcα/μR
Category Immunology
Gene ID 64435
Primary Source MGI:1927803
Synonyms MGC129330; MGC129331; Fcamr

Type Monoclonal Antibody
Immunogen Mouse Fcα/μR expressing cell line

Raised in Fcα/μR deficient mouse
Myeloma Sp2/0
Clone number TX61
Purification ProteinG
Source Serum-free medium
Isotype IgG1,κ

Cross Reactivity Human
Label Unlabeled
Concentration 0.25 mg/mL
Contents (Volume) 50 μg (200 μL/vial)
Buffer PBS [containing 2% Block Ace as a stabilizer, 0.1% Proclin as a bacteriostat]

Storage Store at -20°C long term, store at 4°C short term. Avoid repeated freeze-thaw cycles.

Application IP, FCM, IF

Reference

UniPlot Summary
//Function: Functions as a receptor for the Fc fragment of IgA and IgM. Binds IgA and IgM with high affinity and mediates their endocytosis. May function in the immune response to microbes mediated by IgA and IgM.
//Subcellular location: Cell membrane; Single-pass type I membrane protein.
//Tissue specificity: Expressed in several tissues including thymus, spleen, liver, kidney, small and large intestine, testis and placenta. Expressed by oligodendrocytes, B cells and macrophages but not granulocytes, T cells or NK cells (at protein level).
//Sequence similarities: Contains 1 Ig-like V-type (immunoglobulin-like) domain.
